## Media Release

### Cargolux partners with SkyCell

Luxembourg, 26 October 2017 – Cargolux and SkyCell have teamed up in a global container rental partnership to offer Cargolux's pharma customers an enhanced service with SkyCell's temperature controlled containers. SkyCell is a Swiss-based, award-winning provider of temperature-controlled container solutions with a special focus on emerging markets and sustainability and with one overriding goal: producing the safest container on the market.

With its new containers, Cargolux can safely transport pharma products in the +2°C to +8°C and +15°C to +25°C range in outside temperatures between -35°C and +65°C, even over multiple days. The containers are a boost to Cargolux's cool chain transport services that also offers personal attention, detailed tracking and temperature monitoring for its customers.

"The hybrid function of the SkyCell containers compensate for issues we encounter at destinations where the facilities cannot accommodate pharma shipments that require stringent temperature segregations," says Stavros Evangelakakis, Cargolux Manager Global product. "The SkyCell containers' lower weight and higher net volume also ensure that we effectively reduce our CO<sub>2</sub> emissions while its 100% recyclable components contribute to our lean philosophy and underline our sense of responsibility for the environment, all while heightening our service quality."

Cargolux is the world's first GDP-certified airline, as well as the world's first 'Lean & Green' carrier and operates from one of Europe's most modern pharma and healthcare shipment centers, operated by its partner LuxairCargo at Luxembourg's Findel Airport. Its expert staff is highly trained and motivated with a thorough knowledge and experience in their field. Its fleet of modern 747 freighters ensures the safe, fast and efficient transport of high-value, temperature-sensitive shipments across a global network. Adding SkyCell's patented containers to its portfolio gives Cargolux an additional effective tool that benefits its customers' specialized requirements.

#### **About Cargolux Airlines International**

*Cargolux, based in Luxembourg, is Europe's leading all-cargo airline with a modern and efficient fleet composed of 14 Boeing 747-8 freighters and 13 Boeing 747-400 freighters. The Cargolux worldwide network covers 90 destinations, some 70 of which are served on scheduled all-cargo flights. The company has more than 85 offices in over 50 countries, and operates an extensive global trucking network to more than 250 destinations as well as full and part-charter services. Cargolux also offers third-party maintenance at its modern two-bay maintenance hangar in Luxembourg. The company is specialized in B747 line and hangar maintenance up to and including C-Checks. It offers a range of*

*specialized maintenance services and holds line maintenance approval for 777 aircraft. The Cargolux Group employs close to 1,900 staff worldwide.*
