

DANGEROUS GOODS

In a world of increasingly complex products, the range of industrial and commercial goods that can represent a risk to health or safety is constantly expanding and becoming more difficult to identify....

Safe Air Transportation

Apparently innocuous items such as household goods, medical equipment and automobile or aircraft spare parts contain a wide variety of potentially hazardous substances. Yet every day flammable, corrosive, toxic, spontaneously combustible and infectious materials, explosives, oxidants, poisons, cryogenic liquids, magnetised and radioactive materials are swiftly, safely and efficiently carried by air.

Cargolux- Worldwide expertise

- Modern B747-400 freighter aircraft designed to accommodate all types of Dangerous Goods, including those items that must exclusively fly on cargo aircraft only.
- Specially constructed storage areas fitted with alarms and emergency equipment, minimising the risk of damage during handling, as well as injury to workers and the environment in the event of spillage and leakage.
- Fast transit through the Luxembourg Cargo Centre with less than 100 meters from the storage facilities to the aircraft.
- More than 35 years of experience in the handling of Dangerous Goods.
- Expert load control and handling staff trained in Dangerous Goods.
- Dedicated expert team to handle shipments from departure to arrival.
- Strict adherence to the IATA Dangerous Goods Regulations (DGR), approved by the International Civil Aviation Organisation (ICAO).

The Cargolux Advantage

- Guaranteed onforwarding worldwide
- Scheduled services
- More than 60 destinations worldwide
- More than 90 offices on all continents
- Modern B747-400 freighters with precise temperature control
- Non-stop long haul flights. A further benefit for all ground travel through Luxembourg: direct and virtually traffic-free access to Europe's motorway network.
- Automated shipment tracking and tracing through our internet site.

Worldclass.Worldwide

Cargolux of Luxembourg is one of the leading suppliers of high-quality, worldwide scheduled and charter air cargo services, today ranking as 7th largest air cargo carrier worldwide, and largest all-cargo carrier Europe's.

Cargolux operates a continually growing fleet of B747 freighters, and is the launch customer of the B747-8F. The company has more than 90 offices in over 60 countries and also offers an extensive trucking network to more than 80 destinations in Europe, as well as charter and aircraft maintenance services.

Cargolux has repeatedly been named 'Best All-Cargo Airline' by various trade publications and holds the '2007 Air Cargo Award of Excellence' by U.S. magazine Air Cargo World.

A Dual Responsibility

While the shipper needs to comply with the requirements for packing, marking, labelling and documentation, Cargolux's team of experts ensures that dangerous goods are correctly and safely handled at origin, in transit and at destination. Cargolux's ground handling agents worldwide support these activities. They are trained in accordance with international requirements and licensed for acceptance, storage and loading. With Cargolux, dangerous goods travel in full compliance with the Dangerous Goods Regulations.

Safer Transport with Modern Aircraft

Cargolux's B747-400 freighters are ideally suited for the transportation of dangerous goods. Their spacious cargo holds allow strict segregation of incompatible dangerous goods as well as separation from other sensitive cargo, such as perishables or live animals.

Furthermore, the sidewalks on the main deck ensure the accessibility of dangerous goods even during the flight.
