

We take on the biggest and bulkiest challenges

In today's world of increasingly specific demands, the air freight business frequently caters for commodities of all shapes and sizes. Because outsize cargo involves large and irregular dimensions, loading and off-loading is not straight-forward and only a few cargo airlines can take up the challenge! With years of experience in handling the most difficult loads, dedicated teams of experts, a modern fleet, and extensive ground facilities, we are the exception.

**widths up to
